

Rachael Lang

hello@rachaelklang.com | linkedin.com/in/rachaelklang | rachaelklang.com

Technical Skills

Languages: Java, Python, C/C++, JavaScript, TypeScript, HTML/CSS, Sass, R, SQL, Bash, Assembly, Chinese, Spanish
Frameworks/Libraries: React, React Native, Node.js, Spring Boot, Docker, Android, Unity, NumPy, Pandas, Material UI
Developer Tools: Git, Jira, Docker, Linux, DBeaver, Android Studio, RStudio, Postman, Insomnia, Figma, Tableau

Education

University of Wisconsin–Madison

Jan 2024 – May 2025

Master of Science in Computer Science, GPA: 3.6

Madison, Wisconsin

- Coursework: Human-Computer Interaction, Data Visualization, Data Management, Big Data Systems, Data Exploration and Integration for Data Science, Virtual Reality (Unity), Ethics in Computer Science

University of Wisconsin–Madison

Sep 2019 – Dec 2023

Bachelor of Science in Computer Science, minors in Data Science and Latino Studies, GPA: 3.6

Madison, Wisconsin

- Coursework: Object-Oriented Programming (Java), Data Structures and Algorithms (Java), Data Science Programming (Python), User Interfaces (JavaScript, React), Android App Development (Java, Kotlin), Theory of Programming Languages (JavaScript, Haskell, C++, Rust), Machine Learning, Human-Computer Interaction, Data Modeling (R)

Work Experience

Target Corporation

Jun 2024 – Aug 2024

Front-End Developer Intern

Minneapolis, Minnesota

- Reduced product installation setup time by building an interactive installation guide using React and TypeScript
- Accelerated design feedback through faster iterations by designing 10+ wireframes in Adobe XD for scalable UI planning
- Enhanced installation flow based on usability testing by developing checkbox elements with custom styling
- Maintained accessibility standards through WCAG compliance by performing cross-browser testing across platforms
- Supported 5-year Agile initiative by successfully managing a centralized catalog of over 6 million enterprise assets

Intel Corporation

Nov 2023 – Jan 2024

Software Engineer Intern

Hillsboro, Oregon

- Reduced manual reporting efforts by 20% with Python script to track file changes across a multi-user environment
- Improved data processing efficiency by optimizing script performance, reducing overall system load by 50%
- Increased script reliability by writing comprehensive unit tests covering edge cases on shared network drives
- Boosted workflow throughput by integrating the tracking tool into production, reducing execution time by 17%

Target Corporation

Jun 2023 – Aug 2023

Full-Stack Developer Intern

Minneapolis, Minnesota

- Boosted usability and cross-device engagement by building a responsive web application with React and TypeScript
- Streamlined system communication by 30% by developing Kotlin-based REST APIs for distributed microservices
- Achieved 20% faster query performance in high-traffic environments by tuning PostgreSQL queries using DBeaver
- Ensured robust error handling and accurate response serialization by validating 100+ API calls with Insomnia

The J.M. Smucker Company

May 2022 – Aug 2022

Software Engineer Intern

Orrville, Ohio

- Improved supply chain tracking efficiency by 25% by revamping an Oracle APEX app to modernize the user interface
- Reduced after-hours support requests and alerts by 50% by writing Bash scripts to automate over 10 routine tasks
- Ensured cross-platform compatibility by executing a full system migration with extensive regression testing

Projects

Full-Stack Developer | RachaelTLang.com

- Built a personal website using HTML, CSS, and React, improving usability and accessibility through thoughtful design
- Enhanced inclusive design by implementing and refining responsive features across devices and screen sizes

Data Analyst and Author, Graduate Research Project | The Anatomy of a Successful Restaurant

- Identified key success factors in the Yelp Open Dataset by analyzing engagement metrics and business attributes
- Processed 160,000+ business records by querying with SQL and cleaning data in Python, creating clear Tableau insights
- Delivered actionable findings by applying clustering and correlation analysis to uncover hidden performance patterns

Researcher and Author, Undergraduate Research Project | Python Performance Test

- Evaluated Python 3.10 vs. 3.11 performance by benchmarking execution metrics, confirming reported speed gains
- Summarized findings in a detailed 3-page technical report, demonstrating strong documentation and analysis skills
