Education

University of Wisconsin–Madison

Jan 2024 – May 2025

M.S. in Computer Science, GPA: 3.6

Madison, WI

- Relevant Coursework: Human-Computer Interaction, Data Visualization, Data Management, Big Data Systems

University of Wisconsin–Madison

Sep 2019 – Dec 2023

B.S. in Computer Science, minors in Data Science and Latino Studies, GPA: 3.6

Madison, WI

- Relevant Coursework: Data Structures & Algorithms, Object-Oriented Programming, User Interfaces (React, JavaScript), Android App Development, Machine Learning

Technical Skills

Languages: Java, Python, JavaScript, TypeScript, HTML, CSS, Sass, SQL, R, Chinese (native), Spanish (advanced)

Front-End: React, React Native, Bootstrap, Material UI, Responsive Design, Cross-Browser Testing, Accessibility (WCAG)

Back-End: Node.js, Kotlin, REST APIs, PostgreSQL, Unit Testing

Work Experience

Target Corporation

Jun 2024 – Aug 2024

Front-End Developer Intern

Minneapolis, MN

- Built an interactive React and TypeScript onboarding guide that reduced setup time for new product deployments
- Designed 10+ scalable Adobe XD wireframes and built custom React checkbox components driven by usability testing, improving installation user experience and iteration speed
- Ensured inclusive, high-quality user experiences by conducting WCAG-compliant cross-browser testing and collaborating with designers and engineers to refine components to design-system standards

Intel Corporation

Nov 2023 – Jan 2024

Software Engineer Intern

Hillsboro, OR

- Developed a Python-based file-tracking tool and created comprehensive unit tests for shared-drive edge cases, improving system load by 50% and significantly increasing reliability
- Optimized core processing logic and fully integrated the tool into production workflows, reducing execution time by 17% and ensuring stable performance across multi-user environments
- Enhanced system observability by implementing structured logging and monitoring features, simplifying debugging and accelerating issue resolution for engineering teams

Target Corporation

Jun 2023 – Aug 2023

Full-Stack Developer Intern

Minneapolis, MN

- Built a responsive React and TypeScript web application by implementing reusable components, improving navigation flows, and enhancing accessibility, which collectively strengthened usability and cross-device engagement
- Developed Kotlin REST APIs and validated over 100 request and response flows to improve microservice communication efficiency by 30% and ensure reliable error handling across services
- Tuned PostgreSQL queries to achieve 20% faster performance and application responsiveness in high-traffic environments

The J.M. Smucker Company

May 2022 – Aug 2022

Software Engineer Intern

Orrville, OH

- Modernized a legacy Oracle APEX application to improve supply-chain visibility, increasing tracking efficiency by 25%
- Automated 10+ routine tasks with Bash and executed a full system migration, reducing after-hours support by 50%

Projects

Full-Stack Developer | RachaelTLang.com

- Built a personal website with HTML, CSS, and React, improving usability and accessibility by designing inclusive layouts and refining responsive features across devices

Data Analyst, Graduate Research Project | The Anatomy of a Successful Restaurant

- Analyzed 160K+ Yelp business records using SQL and Python to identify key success factors, producing Tableau insights and uncovering patterns through clustering and correlation analysis

Researcher, Undergraduate Research Project | Python Performance Test

- Benchmarked Python 3.10 vs. 3.11 execution metrics and documented results in a 3-page technical report, validating reported performance gains and demonstrating strong analytical writing
