Education

University of Wisconsin–Madison

Jan 2024 – May 2025

M.S. in Computer Science, GPA: 3.6

Madison, WI

- Relevant Coursework: Human-Computer Interaction, Data Visualization, Data Management, Big Data Systems

University of Wisconsin–Madison

Sep 2019 – Dec 2023

B.S. in Computer Science, minors in Data Science and Latino Studies, GPA: 3.6

Madison, WI

- Relevant Coursework: Data Structures & Algorithms, Object-Oriented Programming, User Interfaces (React, JavaScript), Android App Development, Machine Learning

Technical Skills

Languages: Java, Python, JavaScript, TypeScript, HTML, CSS, Sass, SQL, R, Chinese (native), Spanish (advanced)

Front-End: React, React Native, Bootstrap, Material UI, Responsive Design, Cross-Browser Testing, Accessibility (WCAG)

Back-End: Node.js, Kotlin, REST APIs, PostgreSQL, Unit Testing

Work Experience

Target Corporation

Jun 2024 – Aug 2024

Front-End Developer Intern

Minneapolis, MN

- Engineered an interactive React and TypeScript onboarding guide, reducing internal setup time by 20% and standardizing deployment workflows ahead of product launch
- Designed 10+ scalable Adobe XD wireframes and built custom React form components informed by usability testing, accelerating iteration cycles and improving installation UX consistency
- Drove inclusive, high-quality user experiences by conducting WCAG-compliant cross-browser testing and collaborating with designers and engineers, reducing accessibility defects and aligning components with design-system standards

Intel Corporation

Nov 2023 – Jan 2024

Software Engineer Intern

Hillsboro, OR

- Developed a Python-based file-tracking tool with comprehensive unit tests for shared-drive edge cases, cutting system load by 50% and significantly improving reliability
- Optimized core processing logic and fully integrated the tool into production workflows, reducing execution time by 17% and ensuring stable performance in multi-user environments
- Enhanced system observability by implementing structured logging and monitoring, reducing debugging time and accelerating issue resolution during development and testing

Target Corporation

Jun 2023 – Aug 2023

Full-Stack Developer Intern

Minneapolis, MN

- Built a responsive React and TypeScript web application using reusable components and accessible design patterns, strengthening usability and cross-device engagement in pre-launch testing
- Developed Kotlin-based REST APIs and validated 100+ request and response flows, improving microservice communication efficiency by 30% and ensuring reliable error handling across services
- Optimized PostgreSQL queries using indexing and query-plan analysis, achieving 20% faster performance and improved responsiveness in high-traffic test environments

Projects

Full-Stack Developer | RachaelTLang.com

GitHub Link

- Built a personal website using HTML, CSS, and React, improving usability and accessibility by designing inclusive layouts and refining responsive behavior across devices

Data Analyst, Graduate Research Project | The Anatomy of a Successful Restaurant

GitHub Link

- Analyzed 160K+ Yelp business records using SQL and Python, identifying key success factors through clustering and correlation analysis and delivering actionable insights via Tableau dashboards

Researcher, Undergraduate Research Project | Python Performance Test

GitHub Link

- Benchmarked Python 3.10 vs. 3.11 execution performance and documented findings in a 3-page technical report, validating reported speed improvements and demonstrating strong analytical and technical writing skills
